DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 5, 8, 12-13, 18, 20-24 are rejected under 35 U.S.C. 102(a) as being anticipated by Onishi et al. (6,154,720).

Onishi et al. discloses a word composing apparatus comprising: a dictionary (6) storing at least words and parts of speech corresponding to the words; a search condition designator (2) that designates at least a part of speech as a search condition; a word search unit (3) that searches a word matching the search condition designated by said search condition designator from said dictionary; a display unit (4) for displaying that displays a searched word; and an input processor unit (1) that executes a process of inputting a word displayed on said search result display unit as letters or characters of a song word.

Beigi discloses a word composing method comprising the steps of: selecting a sentence syntax template from a plurality of sentence syntax templates each defining a

typical order of a plurality of parts of speech (column 16, lines 38-60); and inputting words of a song in accordance with the selected sentence syntax template (column 20, lines 3-19).

Onishi et al. disclose a word composing apparatus comprising: sentence syntax storing means for device storing a plurality of sentence syntax templates each defining a typical order of a plurality of parts of speech (abstract); display unit (4) that displays a plurality of sentence syntax templates, based on the stored sentence syntax templates, to urge selection of one sentence syntax template; and designator (5) that designates one sentence syntax template among sentence syntax templates displayed on said display unit.

Onishi et al. disclose a word composing method comprising the steps of: designating at least a part of speech as a search condition (column 35, lines 18-22); and searching a word matching the search condition from a dictionary storing at least words and parts of speech corresponding to the words, and adopting the searched word as part of a song word to be input (column 17, lines 19-40).

Allowable Subject Matter

3. Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 5-8, 12, 13, 18 and 20-24, have been considered but are moot in view of the new ground(s) of rejection.
